Environmental Mission / iDRC and the Environment

We are devoting to product Innovation and development, also effort to environmental protection as social responsibility. while enhancement of our products, the influence of our products to the environment throughout their life cycles has been concerned and controlled by our environmental management that we focus on reducing the impact from product design, material use, manufacturing, packaging, transportation, product use, and recycling.

Purpose of Design

Our purpose of designing and producing the products is to allow every customer to have more efficient use of energy and be able to obtain power in an environmentally friendly way. Furthermore, our products are aimed to help our customers understand the energy operation better in order to precisely develop and design remarkable energy applied products.

Our products include DC power supply, AC power source and Power analyzer. They are mainly used in Wind, Solar and other green power energy research and development laboratories, all kinds of electric vehicles, home appliances and IT products R & D and production. We aim to help these environmentally friendly energies to be well accepted and all of our customers are able to design/develop low consumption products that not only meet the standard but also help to reduce gas emission.

Eliminating Toxic Materials/Substances

We are very strict in selecting materials/substances that we do not use any harmful/toxic substances neither in our products nor packaging. All of our products and packaging strictly follow the rules of RoHs Directive, WEEE and other environmental laws/regulations. We do not only forbidden using harmful toxins, but also seek to exclude the possibility of use of harmful materials in our products.

High Efficiency

From the perspective of high efficiency, we use low consumption equipments (i.e., information equipments that meet EAP energy efficiency requirements) for design. Meanwhile, we also select low-power components and apply the latest technology to reduce energy conversion losses. Applying Active Power Factor Correct (APFC) into the products makes the PF of the products higher than 0.95, which helps to improve the electricity quality of each product and reduce 20%~50% or more of energy waste.

Load energy recycling We use the power regeneration load when testing/manufacturing which can reduce the energy consumption.

Smaller Volume Less energy waste

Designing small, compact, efficient product is another main goal of iDRC. This way can help to use less materials of packaging, and also enhance the efficiency of transportation. Hence, CO2 emission produced during transportation (from vehicles and ships) can be efficiently reduced.

Life

Using high quality components and applying completed protection function into our product makes the life cycle of our products is either much longer or the failure rate is lower than the competitors. It is efficient to reduce CO2 emission and waste produced during transportation, maintenance, and obsolescence.

Recycle

The recyclability of our products is higher than 85%. It means the impact of non-recyclable components to the environments will be reduced.

Innovation

After decades of research and development, iDRC has obtained 224 patents by August 2019 including more than 37 invention patents.

The DSP-Wx series is benefit from 113 patents such as "HOME/BACK" multifunction key, Output-switch control system, Synchronization circuitry ... Making DSP-Wx series in leading position of the world.

DSP-WR Patents

(Total 116 patents including 18 invention patents)

DSP-Wx series

5/10/15 · 6/12/18kW Wide Range Programmable DC Power Supply

DSP-WR/WE Series

- 95% High Efficiency
- 0.99 PF (AC480V 3Ø Input)
- MHz Interleave Technology
- 5" 800x480LCD+Touch Screen
- Intuitive Human Interface

DSP-WA/WAe Series

- LED Indicators
- Appropriate for ATE
- Master / Slave Unit

Features

- All Wide Range; AC mains 180~460V, DC output 0~80V/540A to 0~1950V/27A.
- Maximum 3 power modules inside each with 3-phase ACV input, this design keeps AC mains balance and compliance with worldwide power distribution regulation.
- Output power 5kW ~ 18kW total 32 models.
- Built-in patented Synchronizing circuitry, easy to integrate 100 units to form a 1800kW power supply.
- Active power factor correction, PF>0.99(480V input).
- Efficiency > 95%+. (*2)

Electrical

- MHz switching frequency (15kW and 18kW models), extremely low output ripple and noise. (*3)
- Multiple 32 bit ARM based embedded system, fast boot time of 10 seconds or less.
- Use Wide Bandgap power semiconductors such as SiC MOSFET SBD, result in better performance, higher efficiency and lower heat dissipation..
- Adjustable output voltage, current and power.
- Constant Voltage(CV), Constant Current(CC) and Constant Power(CP), CV. CC. or CP working priority setting.
- With internal resistance adjustment function to simulate characteristic of battery.
- Provide True RMS current and True Watt readings.
- 18 bit DAC for Setting and 24 bit ADC for Measurement.
- Built-in RTC, time is still reliable even when disconnected from time server.
- Customize time synchronization server possible.
- Remote sense functionality compensation voltage up to 5V.

Operational

- 5" touch screen, 3 definable background colors, 3 spin knobs with tactile switch plus 2 buttons provide a excellent intuition operational experience.
- Patented Multi-function HOME/RETURN key.
- Patented output ON/OFF button provides extra layer of safety, only output when both internal switches are triggered.
- Two kind of output mode; output directly by adjustment or after confirmation.
- Programmable over voltage protection and over current protection.
- Programmable output ramp up and ramp down protecting the device under test.
- Up to 8000 sets of V/A/W data storage possible with time resolution of 1ms.
- Three sets of settings can be stored and recalled from the front panel.
- Free software provides control and sequence data setting.
- Data logging with timestamp.

Safety

- Intelligent stepless speed controlled fans reduce acoustic noise and keep system temperature low.
- All models equip with auto-discharge circuit, discharge voltage to safe range within 10 sec. after output off.
- User definable power ON mode (LAST/OFF).
- Close case firmware upgrade with enhance protection design ensure successful system upgrade.
- CE approved, Filled Transport Packages approved and Vibration Test approved.

Interface

- Built-in 2 LAN(LXI 1.4 approved) ports minimize wiring and reduce network complexity.
- Multi-purposed slot for optional interface; GPIB/Serial Port/Isolated Analog.
- Support SCPI commands.
- Provide IVI-COM driver.
- Alarm signal output and Interlock mechanism prevent possible injury.
- Optional isolated analog programming port, 0~5V or 0~10V for setting and monitoring output V/A/W.
- USB hotplug port provides easy data accessibility. (*4)
- Free graphical connection and control software. (*5)
- Easy comparision between wide range and traditional DC power supply with cumtomized software. (*5)

High Power/Current/Voltage Wide Range Output meet all Applications

- Aerospace and Satellite Test
- Semiconductor Equipments
- Solar Cell/Array Application
- Contact/Connector Testing
- Telecom and IT Industries
- Automated Test Equipment
- Battery Testing
- Vehicle Electronics
- DC to DC Convertors
- DC to AC Invertors
- New Energy R&D
- Sputtering and Coating
- Chemical Treatment
- Water Purification
- Electronic Anti-rust
- Factory Automation
- Heat Processing
- QC Testing
- LED Testing
- Lighting
- MOCVD

- note: *1: The ratio varies by model.
 - *2: The efficiency varies by model and input voltage.
 - *3: MHz switching frequency on selective models.
- *4: The format of USB flash drive should be FAT16(2GB) or FAT32(32GB) USB2.0).
- *5: Software available at iDRC website www.idrc.com.tw

Techniques Comparison

iDRC decades years of research and development into DC Power Supply that is more efficient and environmental friendly. Comparing with traditional DC Power Supply, DSP-Wx series has a number of advantages.

15% higher Efficiency

 $\frac{1}{6}$ of Size

 $\frac{1}{2}$ of Weight

15 times faster

Output Characteristic

State-of-the-art DSP-Wx provides various voltage and current combinations at full power. Conventional power supplies with rectangular output characteristics provide full power at only one voltage and current combination, but one DSP-Wx does the job of multiple power supplies, it's just like having 3 to 5 unit power supplies in one.

MHz Switching Frequency

DSP-Wx multi-phase interleaved design boosts switching frequency to 1 MHz. Making DSP-Wx series world's first programable DC power supply to reach MHz level. The higher frequency allows the system to output with minimal ripple, lightning fast response to load variation not achiveable by other system.

Adjustable Ramp Up/Down

- 1. Adjustable ramp up/down during turn on/off stage, protecting sensitive load. Adjustable time range 0.1~99.9s.
- 2. Slew Rate of voltage, current or power(*1) of DSP-WR will be changed according to working mode(CV/CC/CP) and the value of Slew Rate. Slew Rate setting range from 0.01%/ms to 100%/ms.

^{*1.} Exact Slew Rate in output off may influence by load.

Output Protection

Despite DSP-Wx series has build-in Freewheeling Diode in confined space. High duty cycle and inductive load generate reverse EMF, having the Extra Freewheeling Diode ensure DC Power Supply is fully protected. Normally 20% higher in rating is chosen.

Clear and Definite OUTPUT ON/OFF Control

iDRC always design product from user's perspectives. Clean and simple knob control on the front panel. Extra safe 2-tact-switch inside "OUTPUT" button to ensure proper switching at all time.

(Traditional all-in-one key pad with unclear symbol.)

DSP-Wx Firmware Update

Update firmware easily with PC and WR-OPT-FUA adaptor.

RISK FREE

Enhanced safety mechanism to prevent any firmware update failure.

Auto-discharge

DSP-Wx series built-in Auto-discharge circuit, automatically dissipate energy to around 60V in 10 seconds after output off.

No load down time

Model	T1	Model	T1	Model	T1
80V	5 sec	650V	6 sec	1500V	5 sec
160V	10 sec	750V	10 sec	1950V	6 sec
250V	10 sec	1000V	5 sec		
350V	10 sec	1050V	10 sec		
500V	5 sec	1300V	6 sec		

DSP1500-30WR 2.11 seconds discharging time at full loading

Output Capacitance

DSP-Wx series output capacitance as follows:

model	80V	160V	250V	350V	500V	650V	750V	1000V	1050V	1300V	1500V	1950V
5kW	4230μF	-	1350μF	738µF	115μF	115μF			-			
6kW		-		-	115μF	115μF			-			
10kW	8460µF	2115μF	2700μF	1476μF	230µF	230µF		57.5μF	-	57.5μF

15kW	12690µF		4050μF	2214μF	345μF	345µF	450μF		246µF		38.3μF	38.3μF
18kW					345µF	345µF					38.3μF	38.3μF

• Internal Resistance Simulation

Battery-powered electronics are more and more commonly found.

DSP-Wx series built-in unique Internal Resistance Simulation function be able to simulate battery behaviour with 5-digit accuracy.

5kW model	Internal R range
DSP80-180Wx	0~0.4444Ω
DSP250-60Wx	0~4.1667Ω
DSP350-42Wx	0~8.3333Ω
DSP500-30Wx	0~16.667Ω
DSP650-23Wx	0~28.261Ω

Internal R range
0 ~ 13.888Ω
0 ~ 24.074Ω

TOKW Model	internat R range
DSP80-360Wx	0 ~ 0.2222Ω
DSP160-180Wx	0 ~ 0.8888Ω
DSP250-120Wx	0 ~ 2.0833Ω
DSP350-84Wx	0 ~ 4.1667Ω
DSP500-60Wx	0 ~ 8.3333Ω
DSP650-46Wx	0 ~ 14.130Ω
DSP1000-30Wx	0 ~ 33.333Ω
DSP-1300-23Wx	0 ~ 56.521Ω

Power tools

12kW model	Internal R range
DSP500-72Wx	0 ~ 6.9444Ω
DSP650-54Wx	0 ~ 12.037Ω
DSP1000-36Wx	0 ~ 27.777Ω
DS1300-27Wx	0 ~ 48.148Ω

15kW model	Internal R range
DSP80-540Wx	0 ~ 0.1481Ω
DSP250-180Wx	0 ~ 1.3889Ω
DSP350-126Wx	0 ~ 2.7778Ω
DSP500-90Wx	0 ~ 5.5556Ω
DSP650-69Wx	0 ~ 9.4203Ω
DSP750-60Wx	0 ~ 12.500Ω
DSP1050-42Wx	0 ~ 25.000Ω
DSP1500-30Wx	0 ~ 50.000Ω
DSP1950-23Wx	0 ~ 84.782Ω

Electric vehicle

18kW model	Internal R range
DSP500-108Wx	0 ~ 4.6296Ω
DSP650-81Wx	0 ~ 8.0246Ω
DSP1500-36Wx	0 ~ 41.666Ω
DSP1950-27Wx	0 ~ 72.222Ω

DSP-WS Series

Easily and accurately simulate solar array I-V characteristic for PV invertors evaluating. Two modes of creating desire I-V curve, Curve mode and Table mode. With Curve mode, only need to set four parameters through either the Graphical Software (Free download from iDRC website) or input directly on the front panel.

Voc : Open circuit voltage

Vmp: Voltage at maximum power

Isc : Short circuit current

Imp: Current at maximum power

Solar Array Simulator (DSP-WS / DSP-WAs)

Output Power	Models	Max. Voltage	Current @ Max. Voltage	Voltage @ Max. Current	Max. Current

Feature

- With solar array simulation function, imitate output characteristic of various Solar Array.
- Curve Mode and Table Mode 2 types I/V curve, up to 8192 setting pointes to form a smooth and realistic waveform.
- Graphic control software meets EN50530 requirement for free.
- Simulation of IV curve of solar array in different temperature and lux
- Static & Dynamic MPPT efficiency test(accumulated energy method) and log file generating.
- Real time Maximum Power Point Tracing via remote interface.
- Versatile working modes: I/V curve, constant voltage, constant current and constant power.
- The setting of I/V curve can download to DSP-WS series via interface or memory stick to USB port.
- Multi-tasking function allows to control up to 12 units of DSP-WS Solar Array simulator.
- 18 bit DAC for setting and 24 bit ADC for measuring.

• Front Panel

Modern and classical design with individual knob for voltage, current and power control, press to select the digit and rotate to change value.

ARM Cortex-A9 (note) graphical microprocessor brings smooth operation and fast response.

Enter value with numeric pad. Output voltage, OVP and UVP settings on one screen.

Double SAFE Patented 2 tact switchs inside Output On/Off Switch

Equipped with high quality 12x12 cm speed-controlled fan. Rated speed: 4500rpm, Air flow: 150CFM. Reduces noise effectively. Ensure sufficient cooling.

High resolution TFT LCD 800 x 480 WVGA and resistive touchscreen

USB TYPE A connector access USB flash memory up to 32GB.

Wide Range Labeling Easy to obtain the maximum combinative values of voltage and current

Innovative HOME key Tap the HOME key to return to the previous page, press and hold for 1.5 seconds to return to the main page.

Eco-friendly paintless/non-plated stainless steel intake.

Hexagon shape net maximizes ventilation airflow.

Function select either by touchscreen or unique hybrid-task spin knob.

Remote Control Interface

• Rear Panel

- Current sharing
- System IN/OUT
- 4 Auxiliary control
- 10 LAN (LXI) connector
- Slot for optional interfaces
- Output terminals and cover
- Ground terminal (earth terminal)
- 20 Input protective cover
- Remote sense/compensation terminal
- Output terminals
- © Output terminals (80V/10kW & 15kW)
- AC input terminals

Dimensions (mm)

Master/Slave Configuration

The pre-assembled rack with Power Distribution Unit is available for selection.

- Paralleling up to 100 units Up to 1,800kW Up to 54,000A (80V model)
- Master automatically detects all slave units.
- Surplus slave unit(s) can be off to save energy.(*1)
- Zero gap stacking, superior power density. 180kW in 30U rack
- Aggregated display Master unit controls and displays the actual values of entire system.
- Ultra-fast synchronization Up to several Mbps of synchronization, extremely low ripple.

Full remote control.

Sequential power on/off of slaves.

Monitoring power quality and power consumption.

*1: Switch Off from the last unit

Expand the Power Capacity

DSP-Wx and DSP-WAx(blank panel) series Programmable DC Power Supply allows 100 units paralleling to expand the power capacity, the features as follows:

- · Even though 5kW or 10 kW models can be paralleled to form a power system.
- · DSP-WAx series(blank panel) model be able to play as a master.
- · Flexible and versatile integration, next with examples:

Mode 1: 1 unit of DSP-WR/E(Master) + N units of DSP-Wx(Salve)

User can manipulate and have readings on panel or via interface.

Mode 3: 1 unit of DSP-WR/E(Master) + N units of DSP-WAx(Salve)

The most typical power system associated by one full function model as the master plus blank panel models, all controls and readings aggregate to master unit.

Mode 2: 1 unit of DSP-WAx(Master) + N units of DSP-WAx(Salve)

There are master/slave setting switch and indicators behind the intake of DSP-WAx series Programmable DC Power Supply. All operation and display are made by a PC via interface.

Mode 4: 1 unit of DSP-WR/E or DSP-WAx(Master) +N units of DSP-WR/E or DSP-WAx(Slave)

Any one model of DSP-Wxx series be able to play as master or slave, this versatile feature allows user to integrate a power system with any kind of DSP-Wxx models in case of the same voltage and power ratings.

Application

Diode, Laser Diode, LED, Power Chip Testing

DSP-Wx series provides CV(Constant Voltage), CC(Constant Current) and CP(Constant Power) modes, it allows user to select suitable mode correspond to test requirement.

Below shows an application of CC mode avoiding any current/voltage overshoot during diode validation.

Lead Acid /Lithium Battery Testing

- iDRC wide range DC Power Supply can adjust output range to fit various battery layout. Eliminate large number of purpose built power supplies.
- By using DSP-Wx series DC Power Supply, one unit can reach high voltage/low current and low voltage/high current, it significantly reduce cost and space of test equipment.
- DSP-Wx series Wide Range DC Power Supply with sufficient current and voltage capacity to test batteries in parallel or series.

ATE Integration

- DSP-WA/WAe/WAs series without front panel are suitable for ATE and slave unit application.
- Full function design capable of master unit.
- Equip with various indicators to show operating conditions, convenient for visual checking.

Application

Electric/Hybrid Vehicle and General Motor Testing

While electric vehicle pursue even better endurance and energy conversion efficiency, there is an ever-rising demand in hightly flexible and capable DC power supply.

DSP-Wx series DC power supply provides 5kW-1800kW wide range voltage/current control. Capable to adjust to all test scenario.

Power Conditioning of Solar Array and Fuel Cell Testing

DSP-WS series power supply simulates output of solar array and fuel cell, capable of testing wide range of products to meet domestic/commercial regulation.

Commercial Solar array Power System voltage rating has improved from 1000V to 1500V.

High voltage will require less current to achieve the same power rating. Hence new generation solar cell array usually has high loop voltage to simplify wiring, reduce capital expenditure and lower running cost.

DSP-WS DC Power Supply 1950V output meets the demand of high voltage testing.

Wide Range Power Supply versus Conventional Power Supply

This application software is compatible with DSP-WR, DSP-WE, DSP-WS, DSP-WA, DSP-WAs and DSP-WAe

Series Wide Range Programmable DC Power Supply.

- Display output characteristic curve.
- Compare power range of Wide Range Model with Conventional Model
- Display value anywhere on the curve.
- Report Printing
- Show off the output value including: Current at maximum voltage Voltage at maximum current The difference in current

GUI software

This application software is compatible with DSP-WR, DSP-WE, DSP-WS, DSP-WA, DSP-WAs and DSP-WAe Series Wide Range Programmable DC Power Supply.

- Automatic search and connect to DSP-Wx Series Power Supply
- Set and acquire all parameters and readings from DSP-Wx Series Power Supply.
- Save/Load Sequence Mode settings.
- Send sequence data to connected device or save to USB drive

• General Specifications

Environment	
Operating environment	Indoor use
Operating temperature	0°C ~ 50°C
Operating humidity	30%rh ~ 80%rh (no condensation) ,80% RH at 30°C. Decrease linearly to 50% RH at 40°C
Storage temperature	-20°C ~ 70°C
Storage humidity	10%RH ~ 80%RH (no condensation)
Altitude	Up to 2000 m
Cooling	Air cooling with speed controlled fan
Ground polarity	Capable of Negative ground or Positive ground
Memory & Sequence	
Number of memory	3 sets (operating in front panel)
Maximum steps	500 steps per Sequence
Maximum number of sequence	16
Adjustable time range	0.00 sec ~ 999999.99 sec
Standard Interface	
LAN interfaces	1 x LXI 1.4 for communication
Digital I/O	$Function: Interlock,ExternaloutputON/OFF,ShutOFF,\\Alarmsignaloutput,Outputvoltagedownwardsignaloutput,\\$
Optional Analog Interface	
Status output (dry contact)	CV, CC, CP (*9), CR (*9), ON/OFF
Voltage control	user define 0~5V/0~10V refer to 0~100% of rating output voltage
Voltage control accuracy(*2)	±0.2%
Current control	user define 0~5V/0~10V refer to 0~100% of rating output voltage
Current control accuracy(*2)	±0.2%
Power control(*9)	user define 0~5V/0~10V refer to 0~100% of rating output voltage
Power control accuracy(*2)(*9)	±0.2%
Monitoring output	0~5V or 0~10V output for monitoring V/A/W
Monitoring accuracy (*2)	±2%
Reference output	0~5VDC or 0~10VDC (max=5mA)

- *1.0°C ~ 50°C ambient temperature after 30 mins warm.
 - Humidity: Under 80% RH, with 2%~100% of rated voltage, 1%~100% of rated current, measured at the output terminals with local sensing.
- *2. At 23°C \pm 5°C
- *3. Ripple and Noise (rms value) Measurement bandwidth up to 300 kHz
- *4. Ripple and Noise (peak value) measurement bandwidth up to 20 MHz
- *5. Time for output voltage recover to $\pm 1\%$ of rated value when load changes from 10% to 90% (Fign-1)
- *6. Constant load (0~100%), Input changes between 180 ~ 264VAC or 342 ~ 460VAC
- *7. CV : Constant Input (Full input range), current changes 10% ~ 90%
 - CC : Constant Input (Full input range), voltage changes $10\% \sim 100\%$
 - CP: Constant Input (Full input range), voltage x current 10% ~ 90%
- *8. Output response UP time: Time for output voltage rises from 10% to 90% of rated voltage. (Fign-2) Output response Down time: Time for output voltage falls from 90% to 10% of rated voltage.
- *9. DSP-WE/DSP-WAe series not supported.

Programmable Power Distribution Unit series

PDU10 / PDU6 Programmable Power Distribution Unit

Patented innovational design and functions, equipped with digital controller, protection, remote, measurement and multiple connection in parallel, it sequentially controls and secures AC mains supply to the DC power supplies and provides useful CO 2 e and efficiency readings.

Last the eco-friendly principle, PDU series remains stainless steel chassis; no plating and very few painting, state-of-the-art functions help you manage million power easily as well as environment protection.

World First Innovation

- PDU10/PDU6, 4U height, connect with 10/6 units 18kW iDRC DC power supply.
- Master-slave function, control millions watt DC power via single LAN cable.
- 5" 800x480 WVGA+touchscreen associate with knobs and buttons to form an intuitive human interface.
- Built-in AC mains monitoring system, it provides ten and up needful parameters such as V, A, Freq, VA, Watt, VAR, kWh, CO2e and Efficiency.
- Two accumulators inside permanent and resettable.
- CE approved.
- LXI 1.5 approved

Electrical

- 3Ø180~460VAC, 47~63Hz Universal Input.
- Embedded system with multiple 32 bit ARM based MCU, fast boot time of 10 seconds or less.
- Built-in Timer, allows to set output running time.
- Built-in RTC, time remain reliable without a time server.
- Close case firmware upgrading, enhance protection to prevent upgrade failure.
- Full remote control via a single LAN cable.
- Definable power on number of slaves, off the surplus units to save energy.
- Easy to replace individual output terminal.

Safety

- SEMATECH std. EMO button- physically off all managed DC power supplies at once.
- Distinct AC output On/Off button, sequence On/Off DC power supplies.
- Lockable power switch to avoid accidential operation.
- Interlock function.

Interface

- Built-in 2 LAN(LXI) ports, saves the cost of an extra switch hub.
- Fast LAN response time of 3ms.
- SCPI compatible
- Alarm signal output and interlock mechanism prevent potential injury.
- Support USB plug and play, easy to store and read data.

PDU2 Power Distribution Unit

Economic Design for sequential on or off of 2 slaves.

World First Innovation

- PDU2, 1U height, control 2 units 18kW iDRC DC power supply.
- MAX power rate at 36KW
- CE approved

Electrical

- 3Ø180~460VAC, 47~63Hz universal Input
- Sequential power ON/OFF.
- Easy to replace output terminal.

Safety

- SEMATECH std. EMO button, physically off all managed DC power supply at once.
- Distinct AC Output On/Off button to On/Off DC power supply in sequence..

note.: *1. The format of USB flash drive should be FAT16(2GB) or FAT32(32GB) USB2.0

• Functions and Displays of PDU10/PDU6

PDU10/PDU6 provide various readings in different pages.

Turn MEAS knob to switch between pages

Dedicated TIME knob for all time related parameters adjustment

• Web Server Function

PDU10/PDU6 provide web GUI function, it allows user to control the DC power system via ethernet.

PDU Application Example

Patented innovative Power Distribution Unit series consolidate microprocessor and management of two hundred thousand VA AC mains in a 4U height chassis. It significantly simplifies the control and wiring for a 180kW DC Power System.
